

# How to Register for Push Notifications Before Setting Up Your Card Controls & Alerts

(A Push Notification is a message that pops up on a mobile device)

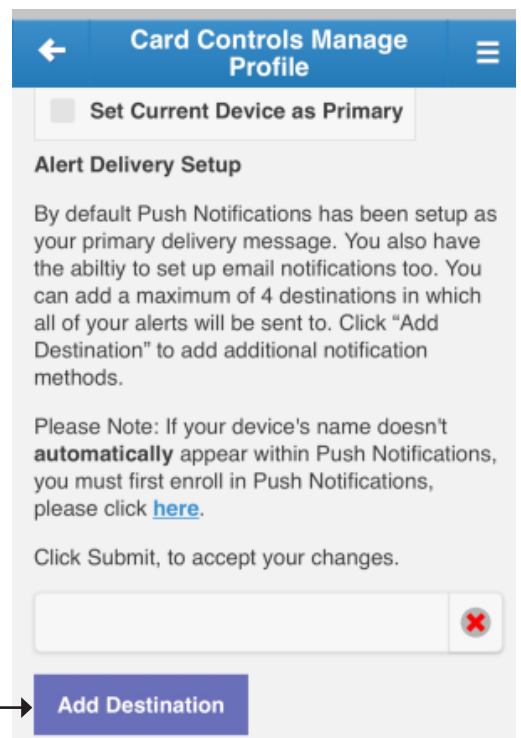

## Step 1:

- Go to "Manage Profile"

## Step 2:

- Click "Add Destination"

### Step 3:

- Locate Device  
(If there is no device, click "close")

Notification Method:

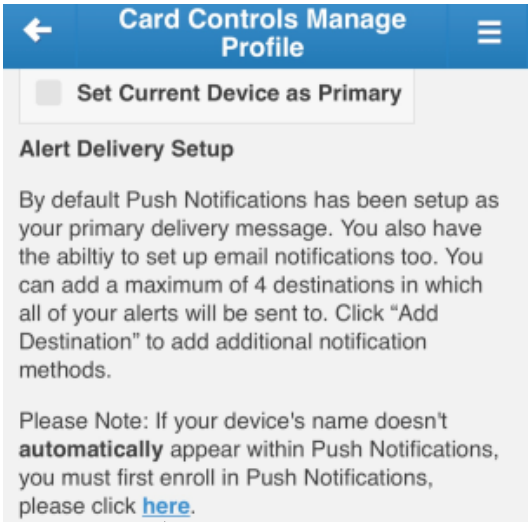

Push Notifications 

Close

Add

### Step 4:

- Click the "here" hyper-link under the Alert Delivery Setup

← Card Controls Manage Profile

Set Current Device as Primary

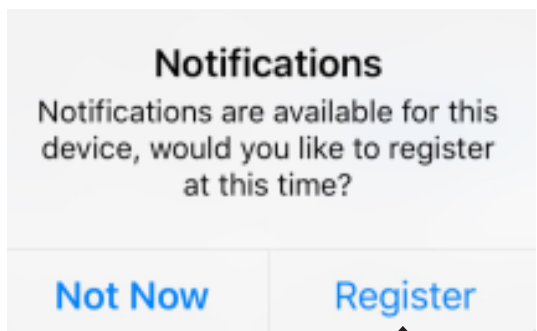

**Alert Delivery Setup**

By default Push Notifications has been setup as your primary delivery message. You also have the ability to set up email notifications too. You can add a maximum of 4 destinations in which all of your alerts will be sent to. Click "Add Destination" to add additional notification methods.

Please Note: If your device's name doesn't **automatically** appear within Push Notifications, you must first enroll in Push Notifications, please click [here](#).

### Step 5:

- Click "Register"

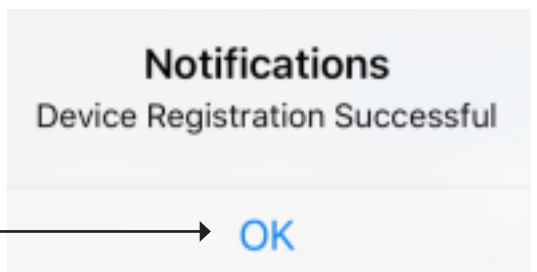

**Notifications**

Notifications are available for this device, would you like to register at this time?

Not Now Register

### Step 6:

- Click "OK"

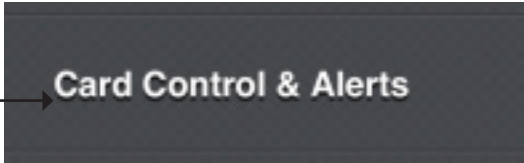

**Notifications**

Device Registration Successful

OK

## Step 7:

- Click on "Card Controls & Alerts" again

## Step 8:

- Click on "Profile Settings"

## Step 9:

- Click "Add Destination"

### Alert Delivery Setup

By default Push Notifications has been setup as your primary delivery message. You also have the ability to set up email notifications too. You can add a maximum of 4 destinations in which all of your alerts will be sent to. Click "Add Destination" to add additional notification methods.

Please Note: If your device's name doesn't **automatically** appear within Push Notifications, you must first enroll in Push Notifications, please click [here](#).

Click Submit, to accept your changes.

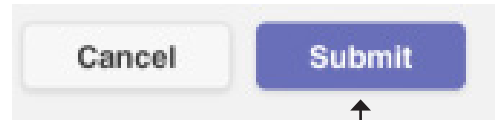

## Step 10:

- Find Device & Click "Add"

## Step 11:

- Click "Submit"

## Step 11:

- Device should appear below. In this example the member is being notified via email and push notification.
